

A Success Story: Soluvine Accelerates Microsoft Dynamics 365 Updates with elevaite365 Test Automation

Microsoft Dynamics 365 Applications are continuously evolving with frequent, mandated updates. To ensure business-critical processes such as reporting and cash flow are not disrupted, each update must be thoroughly tested before deployment.

Soluvine GmbH is an Independent Software Vendor dedicated to delivering reliable, high-quality solutions for Microsoft Dynamics 365 Finance & Supply Chain Management.

About Soluvine GmbH

The company develops FlexxLink, a robust integration platform for B2B/EDI, MES, and WMS, and FlexxStore, a native document management solution designed for everyday operational efficiency. With frequent updates across both D365 and their own products, consistent quality and smooth releases are critical for Soluvine's growth and the success of their customers.

In mid-2025, Soluvine began looking for a way to reduce the time, cost and risks faced by constant, mandated Microsoft D365F&O updates. With mounting pressure from the increasing update frequency, manual testing alone could no longer keep pace with the growing scope. The team at Soluvine needed to ensure continuous compatibility between their product version and new and existing Dynamics 365 service updates.

With an increase in features and thereby testing scope, their team needed a solution that could reduce effort, increase coverage, and help them identify potential issues as early as possible in the development cycle.

Analyzing out-of-the-box testing tools as well as third-party test automation software solutions, elevaite365 convinced the team at Soluvine with a feature set that satisfied current and future testing needs while offering a competitive cost-benefit ratio.

elevaite365 Test Automation delivers comprehensive end-to-end testing for Dynamics 365:

- ▶ Microsoft Recommended
- ▶ Purpose-built for Dynamics 365 users
- ▶ Enhanced with AI
- ▶ Accessible and flexible license model
- ▶ Local support around the world

I'd recommend elevaite365 Test Automation to anyone needing to test updates across multiple environments. There are significant benefits for D365 F&O customers who need to validate core, essential business processes reliably and efficiently'

Lukas Reiter, Managing Director at Soluvine GmbH

Manual Testing Roadblocks

Manual testing is **time-consuming**, as each test case must be executed individually which can cause significant delays.

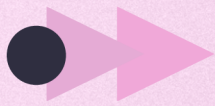

Manual testing is prone to **human error** as testers may overlook defects or inconsistencies, leading to incomplete or inaccurate testing results.

Scalability limitations - as ERP systems grow and integrate with more modules and third-party applications, manual testing struggles to keep up with the increased complexity and volume of tests required.

Ensuring comprehensive **test coverage** manually is difficult as some areas may be tested more thoroughly than others.

Success Built on Transparency, Agility and Innovation

Beyond the product itself, Soluvine has found exceptional value in elevaite365's support and collaboration, who quickly demonstrated a willingness to listen, adapt and deliver. Prior to becoming a customer, Soluvine requested additional functionality to support testing on different platform updates.

Committed to delivering value for customers, elevaite365 refined their Test Automation tool within weeks to allow test cases to be copied across multiple environments. Additional feature requests are already in the development pipeline, reinforcing the sense of a true partnership, rather than a traditional vendor relationship.

'The elevaite365 team is very responsive and genuinely interested in understanding our unique testing requirements. They're committed to evolving the product based on real-world feedback.'

Lukas Reiter, Managing Director at Soluvine GmbH

With an ever-increasing test coverage, elevaite365 is becoming a vital part of Soluvine's development and testing processes, ensuring high-quality software products and peace of mind for the team at Soluvine and their customers.
