elevaite365® TEST AUTOMATION

elevaite365 Test Automation is purpose-built for Dynamics users.

Relying on business users to validate critical processes is both time-consuming and prone to human error. With their main focus on finance, sales, or operations, these users often have limited time for testing, making it easy to miss scenarios or overlook potential issues.

elevaite365 Test Automation is designed for real-world teams who lack technical expertise or time to manually test every D365 update. With its intuitive no-code interface, users can effortlessly create, manage, and execute test scripts up to 90% faster — ensuring accuracy and confidence with every release.

On average, our customers have reduced their upgrade testing time **from 5 weeks down to just 3 days.**

Why choose elevaite365?

- **RECOMMENDED BY MICROSOFT**
- **DESIGNED FOR DYNAMICS USERS** with intuitive pre- built templates
- **COMPREHENSIVE END-TO-END TESTING** of all D365 Applications, Integrations and Windows Apps
- **ACCESSABLE & FLEXIBLE** pricing model
- **EASY IMPLEMENTATION** including instant conversion of RSAT test scripts
- **COMMUNITY DRIVEN DEVELOPMENT MODEL** constant improvements influenced by users

elevaite 365® TEST AUTOMATION

Microsoft D365 updates shouldn't be a gamble.

You've invested in D365 to streamline and improve operations, but without thorough testing, your investment is exposed every time you rollout a new release. A single missed defect can quickly explode into a full-scale crisis resulting in costly disruptions that impact cash flow. elevaite365 Test Automation makes it easy to validate critical workflows, so you can get ahead of any issues before they hit production.
